Folks --

Here is yet another request for TASC at SSFL. This guy attends all of the meetings and is quite educated. In general, his position seems to be that there is no or little risk.

The number of requests for TASC support might argue for us conducting one or two additional community meetings prior to Craig's release of sampling data so that residents will be prepared to understand the results when they are released. Or we could take Nicole's background study results meeting and add an agenda item to cover the material that Abe and the other's want. This would require some informal canvassing of Chris, Christina, Dan, Bonnie and some others to find out what topics we should cover. Of course, we would have some ideas about what topics to cover, too.

So, we could respond to Abe with the promise of EPA meetings to address his request for TASC.

-- Dave

Hi Abe-

I am forwarding your message about TASC to Craig Cooper and David Cooper as they are handling this part of the project.

Nicole

Hi Nicole,

I forgot to ask. What is the chance of getting help from TASK to educate the neighbor stakeholders on the data that you will be giving them. I expect that the activists will not like it, but the rational ones might benefit from some "neutral" support.

Abe
